Reason for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggest a disturbance-compensation system in a disk drive system for obtaining an amount of disturbance based on a time-interval measurement in reading predetermined servo information sectors of the disk so as to compensate position of the disk drive head according to the amount of the disturbance. It is noted that, the closest prior art, Hamada et al (USPN 5,402,400) shows a disk device with disturbance compensation, specifically controlling the disturbance compensation by adding first and second external disturbance compensation signals to a positioning compensation signal supplied to a drive circuit. However, Hamada et al fails to disclose on how the amount of disturbance compensation signal is obtained.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
